

WHAT IS

**EARLY
INTERVENTION**

FOR

AUTISM

What is Early Intervention?

Intervention is taking an action to improve one's condition. EARLY intervention is giving children educational support to improve one's condition at an early age.

What is Early Intervention?

Early Intervention

Programs help children with special needs get the basic skills they need such as:

- Social Skills
- Work habits
- Communication
- Fine Motor
- Gross Motor
- Adaptive Skills

Challenges in Early Intervention

- Long waitlist
- Lack of Teacher training on Autism
- Limited teaching materials available
- Limited training on how to use materials
- Lack of Special Education Teachers in schools.
